

T-40

**Printer Driver Manual
Mac OS x**

Introduction

This printer driver supports Mac OS X v10.5 or higher on Intel Macs.

1. Installing /Registering /Delete Printer Drivers

Notes: 1) Turn on the printer's power after performing "Installing Printer Drivers".
2) The printer with USB interface must be in printer/WinDriver mode.

Place the T-40_MacDrv_EN VX.X.tar file on your Windows OS and expand it.

If the printer is USB interface, confirm the printer mode firstly, if the mode is API mode, please change the mode to printer mode.

1.1 Installing Printer Drivers

To install the driver, proceed as follows.

1. Place the T-40.pkg file downloaded via the website or other methods on your desktop or home directory in Mac and expand it by double-clicking on the file.
2. The screen below is displayed.

Double-click < T-40.pkg > to begin the installation.

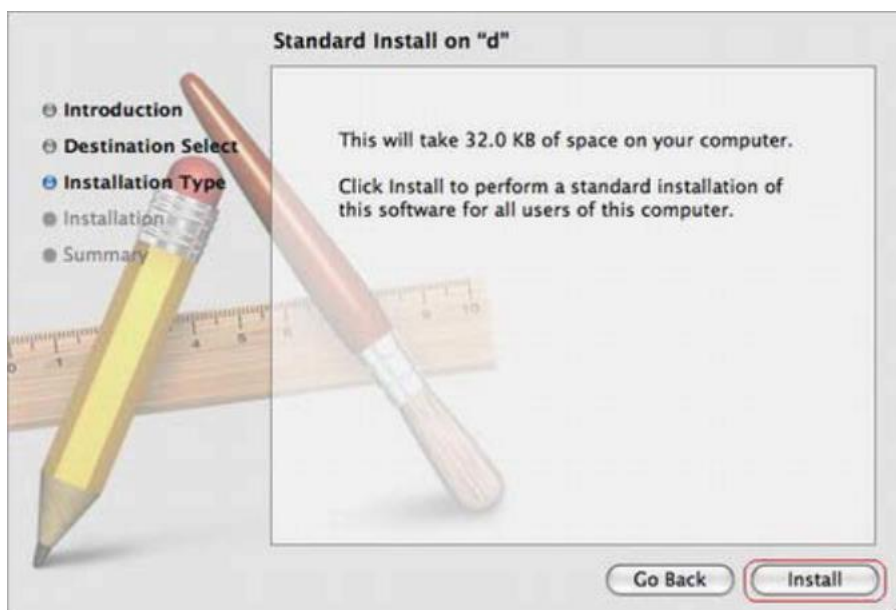

3. The following window is displayed.

Click [Continue].

4. Click [Install] to start the installation.

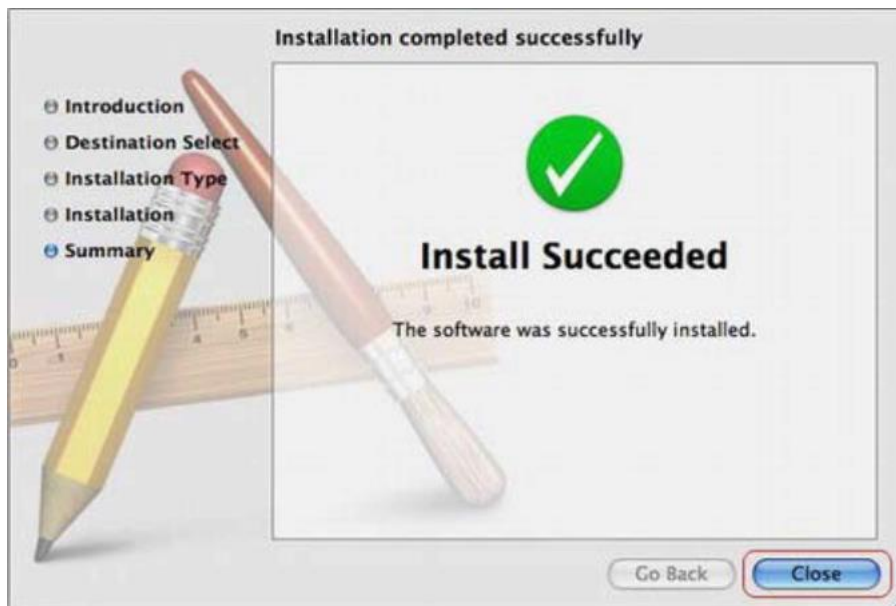

5. If the confirmation window shown below is displayed, enter the user name and password having administrator rights, then click [OK]

6. The installation ends successfully.

When the installation has ended successfully, the window shown below is displayed. Click [Close].

1.2. Registering the Printer

Procedures for registering the printer differ according to the type of interface you use. See the page relating to your environment.

1.2.1 When using a USB Interface

Cautions: When using a USB interface, turn on the printer's power before performing the following.

1. In the Apple mark in the menu bar, open [System Preferences] and double-click on the [Print & Fax] icon.

2. Connect the printer, and then turn on the printer's power switch.

The Plug and Play feature detects the connection of the printer hardware and automatically installs the driver software.

3. Click [+] to install the printer driver.

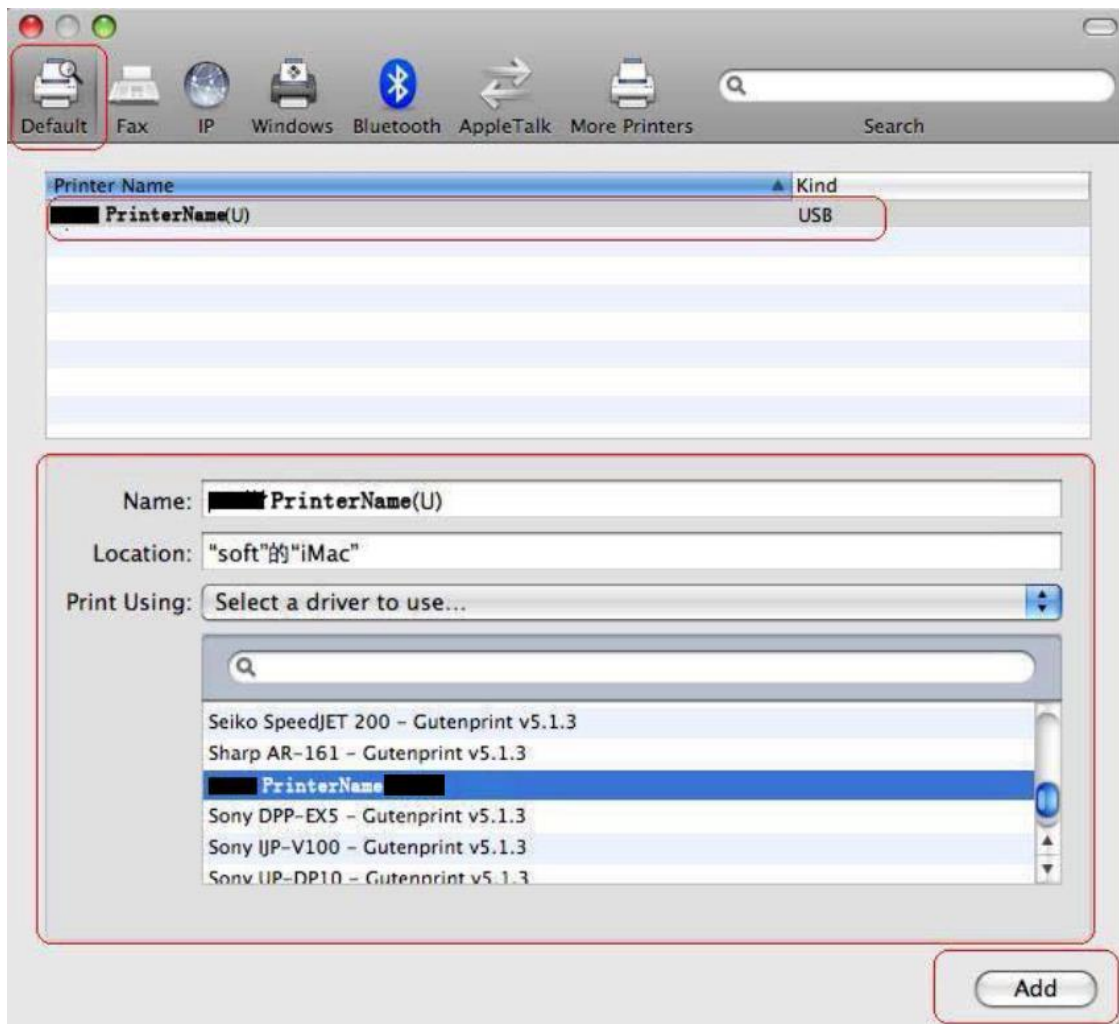

4. Select the USB printer created using plug-and-play from the "Default Browser," make

the following settings and click [Add].

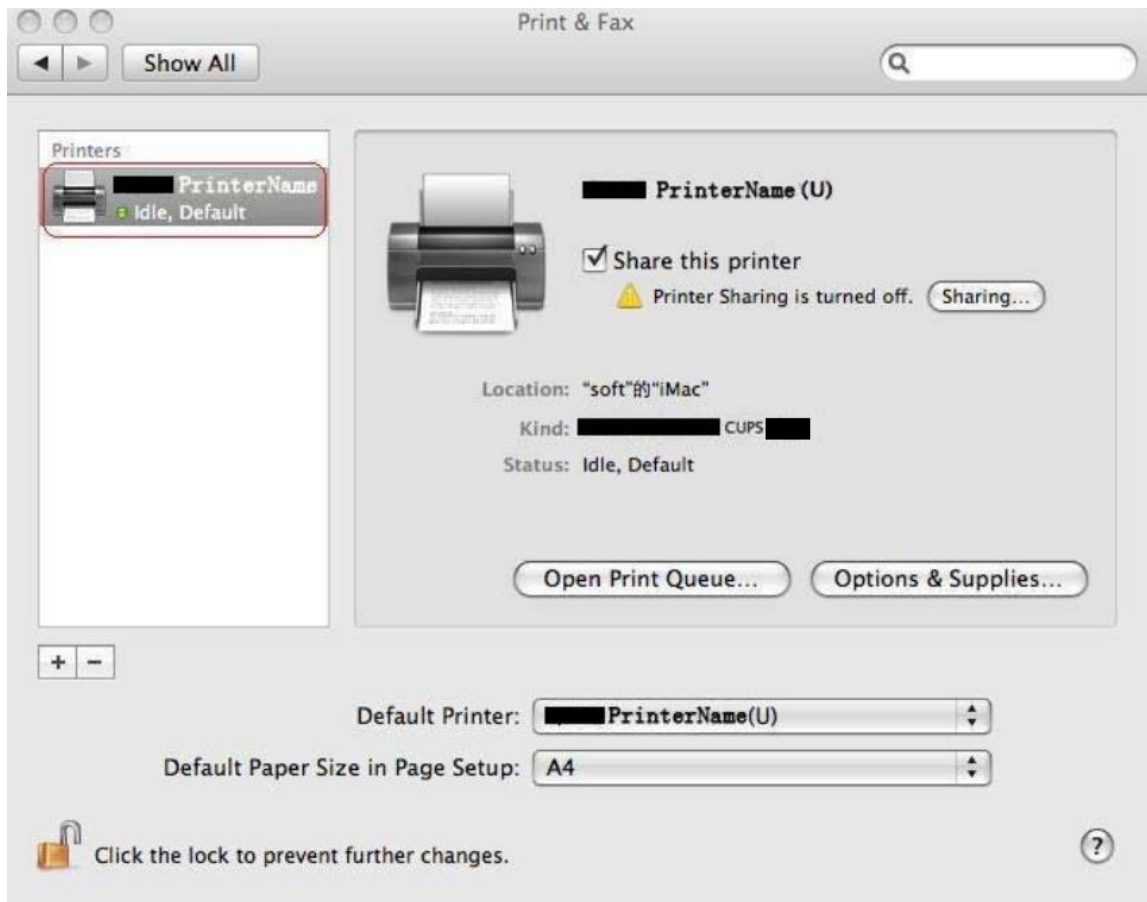

Name: Arbitrary character string (change the name from the name of the receipt driver displayed.)

Print Using: Select the driver to use....(Select a driver to use...)

5. If the name of the specified printer is added to the printer list, the printer has been added.

if necessary, return to #3 above and added all the required printer drivers.

1.2.2 When using Ethernet Interface

1. In the Apple mark in the menu bar, open [System Preferences] and double-click on the [Print & Fax] icon.

2. The Print & Fax window appears. Click on [+].

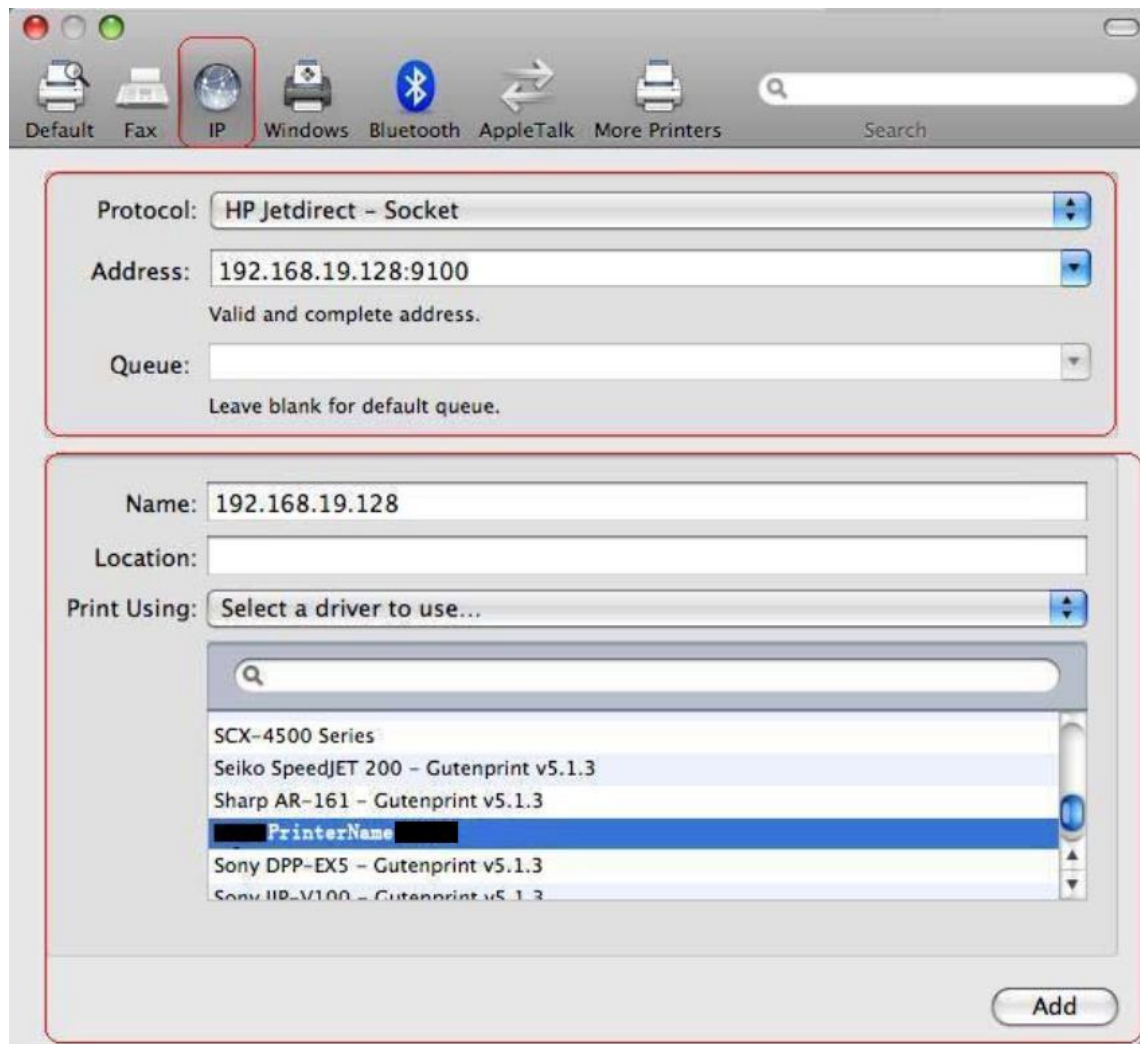

3. Using port 9100, set the following.

Protocol: HP Jet Direct-Socket

Address: [IP address of printer being set]:9100

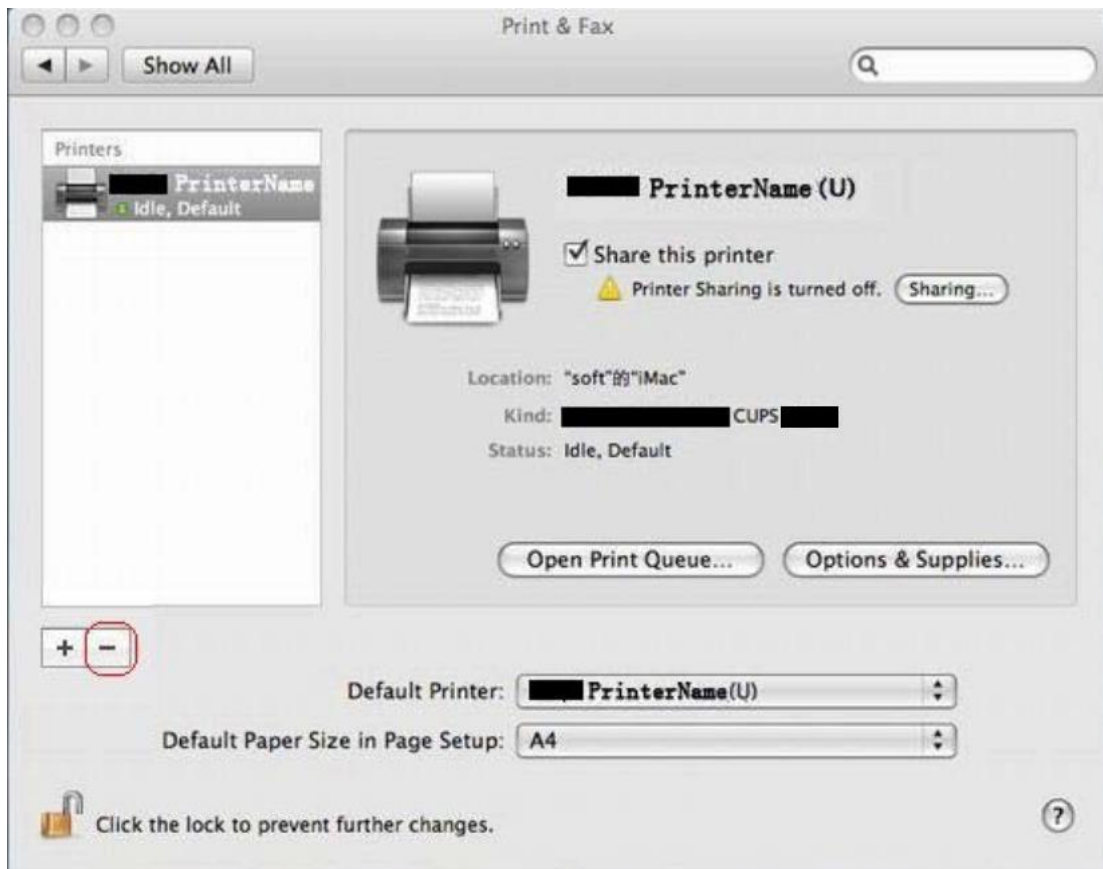

Print Using: Select the driver to use.

Select a driver to use.

1.3 Delete Printer Drivers

Click on [-] to delete the installed printer driver in Print & Fax window.

2. Setting the Printer Functions

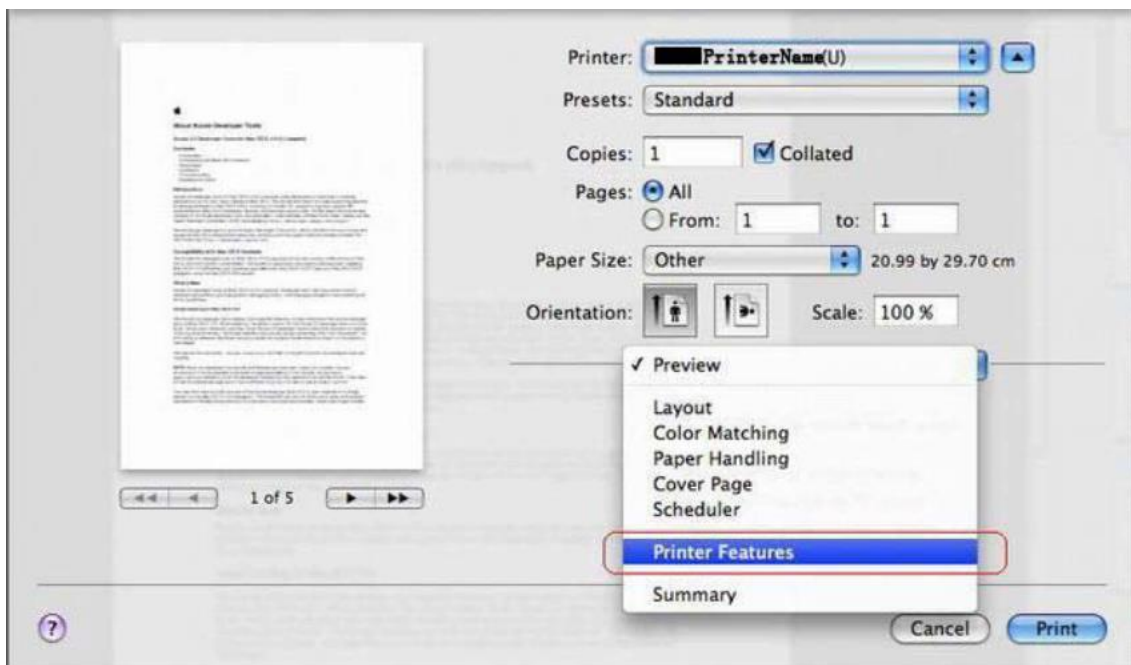

Notice: The options of current printer driver may be different from the parameters of the following pictures. The pictures are only used for reference.

Use the dialog box opened by [File]->[Print] in the Mac OS X menu.

From the "Printer:" pull-down menu, select the printer name to set, the click[▼] to display the details.

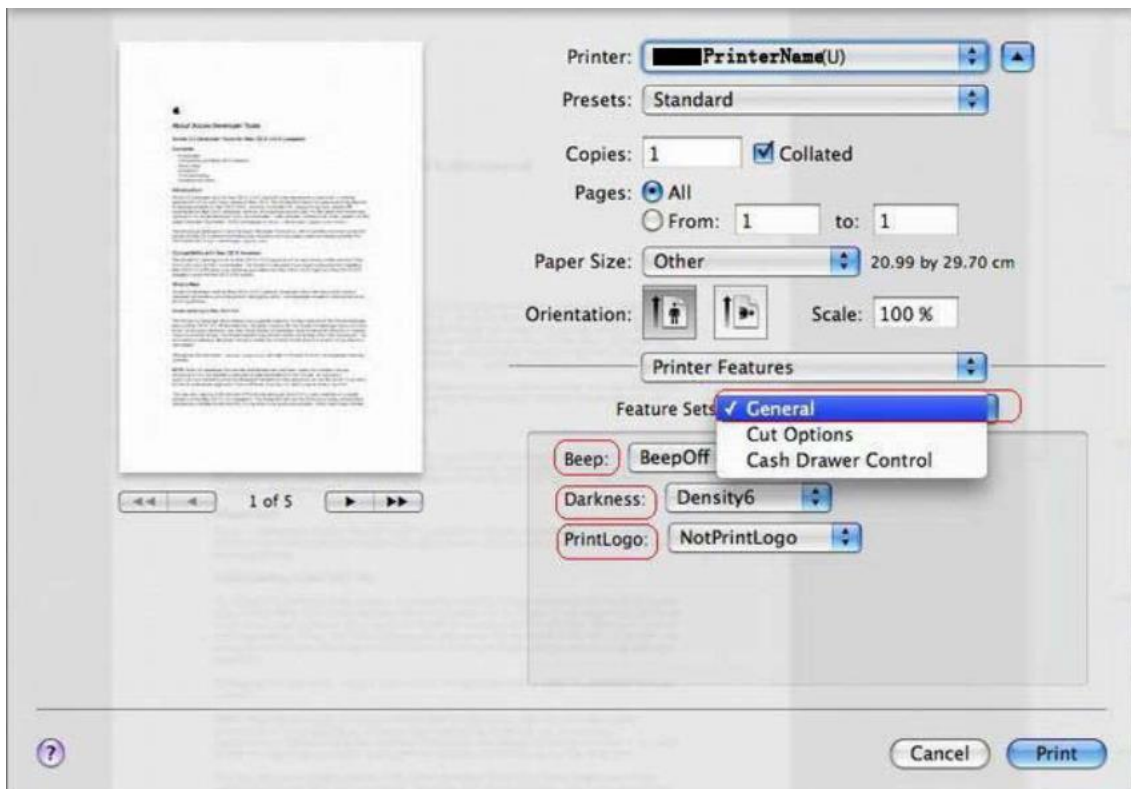

Select "Printer Features" from the setting pull-down menu.

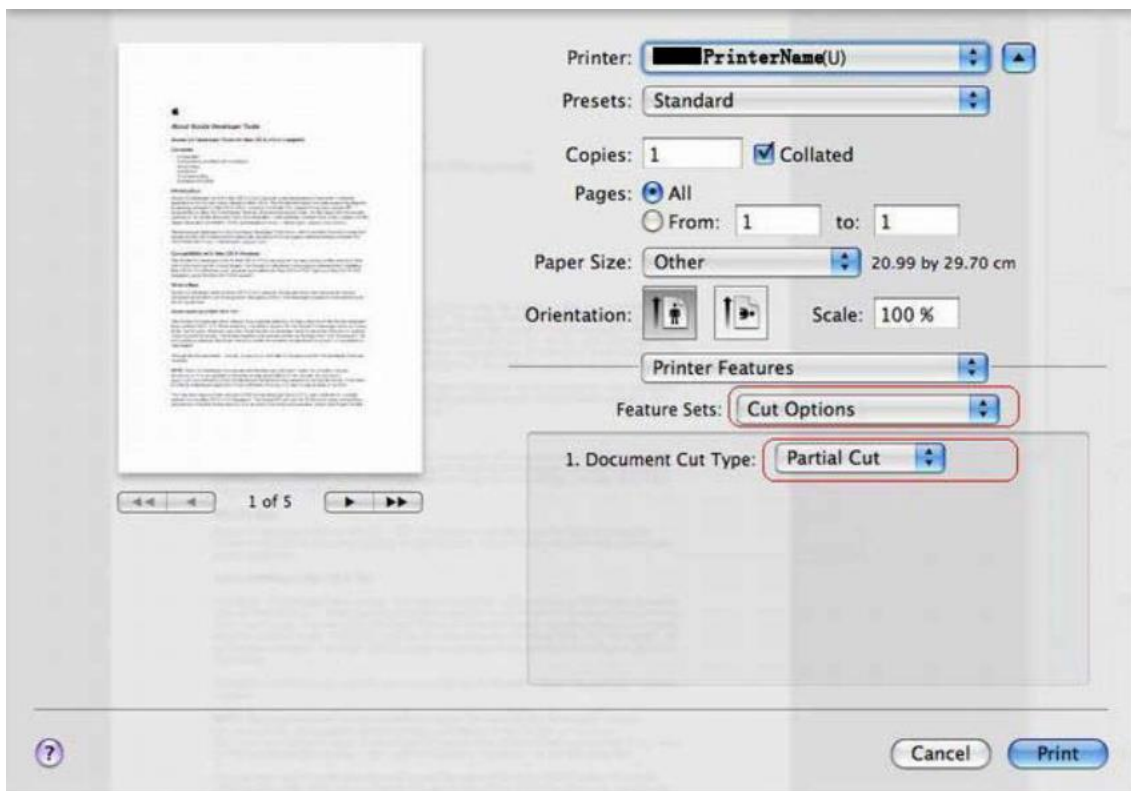

"Feature Sets:" Selects function that make settings.

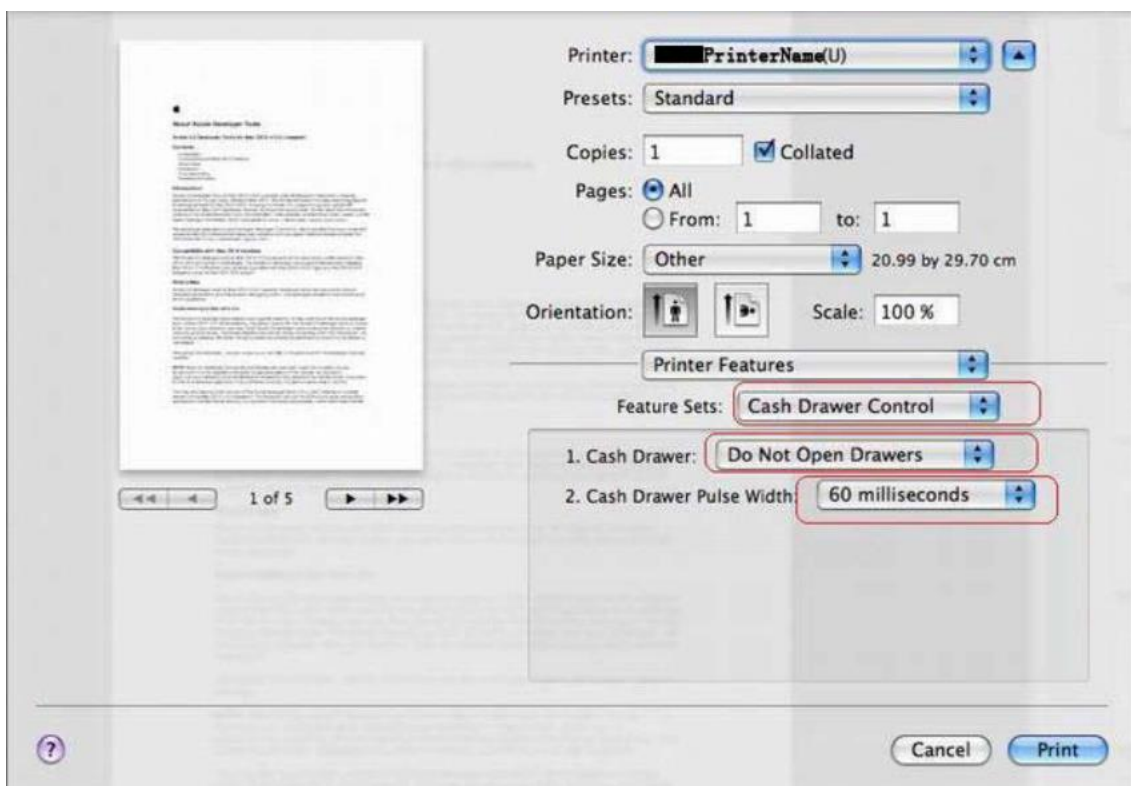

There are these settings: Beep, Darkness, PrintLogo when select "General" .

Cut Type when select "Cut Options".

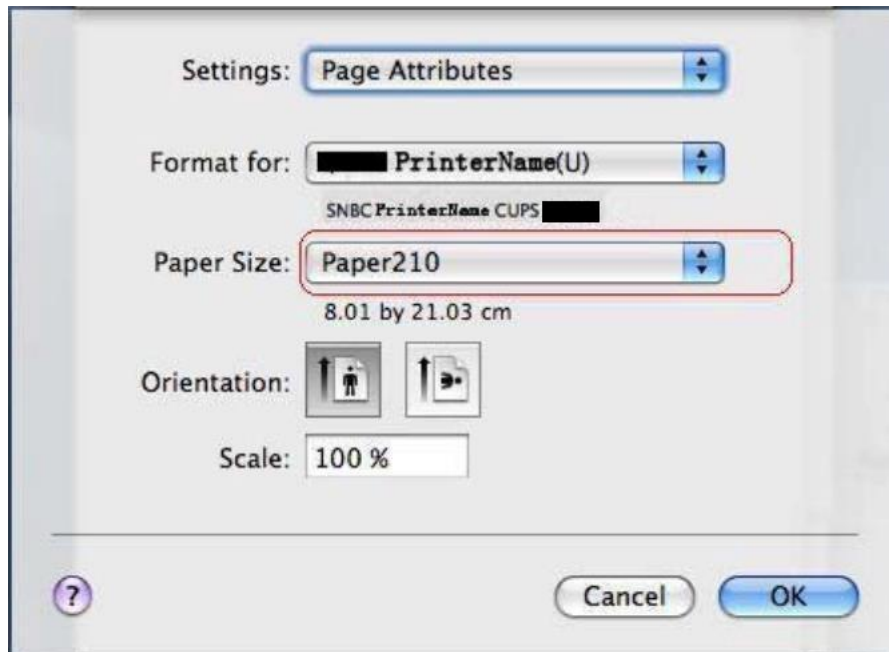

Cash Drawer when select "Cash Drawer Control".

3. Setting the Paper Size

With OS 10.5 from the menu bar on Mac OS X, open [File]->[Page Setup].
Select the paper size from the Paper Size pull-down menu.
